## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 9-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Linton in view of Pellegrino. Linton discloses in column 3, line 48 to column 6, line 36 of the specification a system for professional development of instructors comprising the steps of providing an instructor with training over the Internet that teaches skills in accordance with measurable standards. Linton further discloses in column 9, lines 36-35 that reports are generated based on comparisons of performance to measurable standards and provided to teachers and administrators. Linton fails to disclose a lesson plan development system as recited. However, Pellegrino discloses in column 17, lines 13-33 and column 20, line 16 to column 21, line 49 an online system comprising a matrix for use by an instructor in developing lesson plans. It would have been obvious to one of ordinary skill in the relevant art to modify the teachings of Linton by providing a lesson plan development matrix for the purpose of allowing a user to assist an instructor in developing a lesson plan as part of the training. The step of providing worksheets as recited is considered to be an obvious variation on the teachings of Linton and Pellegrino, as worksheets are well known in instructional settings and both Linton and Pellegrino discloses a step of providing instructional information over the Internet. With

respect to claims 2 and 3, Linton discloses a step of providing evaluation reports to supervisors and instructors as noted above. With respect to claim 4, 9, 11 and 18, Linton discloses in column 2, lines 24-34 professional development training based on standards relating to the profession. With respect to claims 5 and 10, Linton discloses on-line training (see e.g. col. 6, lines 16-20). With respect to claim 6, Linton discloses in column 8, lines 11-29 that the instruction comprises video. With respect to claim 12, the step of providing instruction pertaining to professional standards inherently involves inputting said standards and data into electronic media. With respect to claim 13, while Linton does not explicitly disclose the use of pedagogical standards, such standards are obvious in light of the teachings of Linton. With respect to claims 14-17, Linton discloses third party access to the standards and the steps of evaluating the success of the training and modifying them in response thereto, as well as evaluating the professional. With respect to claims 19-21, as noted above Linton discloses in column 9, lines 37-65 the claimed method steps. With respect to claim 22, providing the training to parents would have been obvious in light of the teachings of Linton.

#### ***Response to Arguments***

Applicant's arguments with respect to claims 1-6 and 9-22 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Grudnitski, Woodson, Greene, Ziv-El, Freeman, Nichols, Siefert, Sudman and Barry disclose various training systems.
